## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference P22279PCAU	<b>FOR FURTHER ACTION</b> See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416).	
International Application No. <b>PCT/AU2003/001713</b>	International Filing Date (day/month/year) 22 December 2003	Priority Date (day/month/year) 20 December 2002
International Patent Classification (IPC) or national classification and IPC Int. Cl. <sup>7</sup> A61K 6/083		
Applicant NSI DENTAL PTY LIMITED et al		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 3 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of sheet(s).

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 20 July 2004	Date of completion of the report 6 April 2005
Name and mailing address of the IPEA/AU AUSTRALIAN PATENT OFFICE PO BOX 200, WODEN ACT 2606, AUSTRALIA E-mail address: pct@ipaaustralia.gov.au Facsimile No. (02) 6285 3929	Authorized Officer  S. Chew Telephone No. (02) 6283 2248

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/AU2003/001713**I. Basis of the report****1. With regard to the elements of the international application:\***

- ☒ the international application as originally filed.
- ☐ the description, pages , as originally filed,  
pages , filed with the demand,  
pages , received on with the letter of
- ☐ the claims, pages , as originally filed,  
pages , as amended (together with any statement) under Article 19,  
pages , filed with the demand,  
pages , received on with the letter of
- ☐ the drawings, pages , as originally filed,  
pages , filed with the demand,  
pages , received on with the letter of
- ☐ the sequence listing part of the description:  
pages , as originally filed  
pages , filed with the demand  
pages , received on with the letter of

**2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.**

These elements were available or furnished to this Authority in the following language which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

**3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:**

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

**4. ☐ The amendments have resulted in the cancellation of:**

- ☐ the description, pages
- ☐ the claims, Nos.
- ☐ the drawings, sheets/fig.

**5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).\*\***

\* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

\*\* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/AU2003/001713

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement.**

Novelty (N)	Claims 3-6, 9-18	YES
	Claims 1, 2, 7 and 8	NO
Inventive step (IS)	Claims 3-6, 9-18	YES
	Claims 1, 2, 7 and 8	NO
Industrial applicability (IA)	Claims 1-18	YES
	Claims	NO

**2. Citations and explanations (Rule 70.7)****NOVELTY (N): Claims 1, 2, 7 and 8**

D1 EP 976386A

D2 US 5133957 A

D3 WO 1999/020227

D4 US 5797749 A

Claim 1 is directed to a formulation which is characterised by the incorporation of at least one light curable monomer that forms a resilient polymer gel upon curing.

Claim 2 is directed to a dentine sensitivity reducing formulation that includes any light-cured, form-stable, resilient gel polymer.

D4 (US 5797749) has disclosed a formulation for desensitising teeth comprising 2-hydroxy ethylmethacrylate, which is one of the monomers used in the present application. It is also disclosed that the 2-hydroxy ethylmethacrylate polymerises readily in air. Although the citation did not mention the formation of a resilient polymer gel upon curing, I consider this feature to be inherent in the polymerised monomer.

I also consider the term "that forms a resilient polymer gel upon curing" to be non-limiting as it merely denotes that the monomer has the capability to form a resilient polymer gel upon curing.

Therefore claims 1, 2, 7-8 are not novel in the light of the disclosure of D4.

Claims 3-6 and 9-18 are novel and have an inventive step as none of the citations D1 – D3 disclose or fairly suggest all of the features of the claims.

**INVENTIVE STEP (IS): Claims 1, 2, 7 and 8**

As above.

**INDUSTRIAL APPLICABILITY (IA): Claims 1-18**

Claims 1-18 have industrial applicability.
